Tempe, AZ | P: +1(623)-200-8862 | patrapriyanshu22@gmail.com | LinkedIn | Portfolio | Github

EDUCATION

Arizona State University — Tempe, AZ, USA
Master of Science in Data Science, Analytics and Engineering (DSAE) | GPA: **4.0/4.0** — Aug 2025 – Expected May 2027

SRM Institute of Science and Technology — Chennai, India
Bachelor of Technology in Computer Science and Engineering (CSE) | GPA: **3.58/4.0** — Sep 2020 – May 2024

SKILLS

Programming & Data Analysis: Python, SQL, Pandas, NumPy, Data Cleaning, Exploratory Data Analysis
Business Intelligence & Visualization: Power BI, Tableau, Excel, Power Pivot, DAX, Data Modeling, KPI Reporting, Matplotlib
Statistics & Mathematics: Regression, Hypothesis Testing, A/B Testing, Time Series Analysis, Linear Algebra, Calculus, Optimization
Machine Learning: Scikit-learn, Random Forest, Gradient Boosting, Neural Networks, NLP, Recommendation Systems, TensorFlow, PyTorch
Databases: MySQL, MongoDB, Neo4j, Stored Procedures
Cloud & Tools: AWS, Microsoft Azure, Google Cloud Platform, Git, Docker, Flask, Streamlit

PROJECTS

E-Commerce Sales Analysis Dashboard | *Power BI, DAX, Data Modeling* — Jul 2026
- Built an interactive Power BI dashboard analyzing 500 orders and 1,500 transaction records, connecting order and transaction tables through a one-to-many relationship.
- Visualized sales, profit and purchasing patterns across states, product categories and payment methods, with quarter and category filters to explore performance trends.

Urban vs Rural Energy Intensity Analysis | *Python, Pandas, Statsmodels, GeoPandas, Matplotlib* — Oct 2025 – Dec 2025
- Merged NREL and USDA datasets using county FIPS codes across 15 Arizona counties, engineering per-capita energy metrics and classifying counties using Rural–Urban Continuum Codes.
- Applied two-sample t-tests and OLS regression to examine urban–rural energy consumption differences, creating choropleth maps and statistical visualizations to inform transportation efficiency recommendations.

AI Data Analyst Agent | *Python, SQL, Pandas, SQLite, Gemini API, Flask, Matplotlib* — Jun 2026
- Built a Flask application supporting CSV uploads and conversational data exploration, with Pandas-based profiling of missing values, duplicate records and descriptive statistics.
- Integrated Gemini-generated SQL with an in-memory SQLite query engine and added Matplotlib chart generation, presenting generated queries alongside conversational responses.

MA Rank - Multi Agent Resume Screening System | *Python, LangGraph, Neo4j, NLP, Streamlit* — Mar 2026 – May 2026
- Contributed to a five-agent pipeline for resume parsing, skill normalization and candidate ranking, using Neo4j for graph storage and Streamlit to display matched skills, missing skills and uncertainty indicators.
- Achieved Precision@10 of 0.80 versus 0.50 for BM25 in a single-job evaluation; the project dataset contained 500 augmented resumes and 1,534 job postings.

EXPERIENCE

Arizona State University — Tempe, AZ
Instructional Assistant, CSE 205: Object Oriented Programming & Data Structures — Sep 2026 – Present
- Guide CSE 205 students through Java, object-oriented programming, data structures and debugging during office hours and course discussions.
- Clarify assignment requirements, support problem-solving and assist with instructional activities, including Honorlock review.

Grader, CSE 511: Data Processing at Scale — Aug 2026 – Present
- Evaluate assignments and assessments for CSE 511: Data Processing at Scale, applying course rubrics to provide consistent grading and constructive feedback.
- Collaborate with the instructor and teaching team to resolve grading questions and complete evaluations on schedule.

Edunet Foundation, Microsoft & SAP Initiative
AICTE Virtual Intern — Feb 2025 – Mar 2025
- Developed an NLP-based resume screening pipeline using Python and spaCy for candidate scoring and ranking during a mentor-guided virtual internship.
- Built a Flask REST API to serve the screening model and return resume scores.

Edunet Foundation, EY-GDS Initiative
AICTE Virtual Intern — Sep 2024 – Nov 2024
- Built an expense tracking application using the MERN stack and Recharts, providing visual summaries of recorded expenses during a mentor-guided virtual internship.
- Implemented JWT authentication and role-based access control to separate user data in an AWS-hosted application.

CERTIFICATIONS

AWS Educate Introduction to Generative AI by Amazon Web Services — Apr 2026
Microsoft AI & ML Engineering by Coursera — Mar 2025
SQL (Advanced) by HackerRank — Mar 2025
